

An Ingenious Fraud.
The Boston Commercial Bulletin says: We have before us a preparation invented in New York for "extending tea; it is made of wheat husks taken from the barn floor after threshing, slightly crushed, and then colored black and green for the different varieties of tea which it is designed to adulterate. This article is styled "Japan Tea," and is already extensively used in New York and Philadelphia, where it is sold to grocers for mixing with genuine tea, which they sell at from 75 cents to \$1.50 per pound.

The price of the adulteration is from twenty to thirty cents per pound. It is tasteless and perfectly harmless, if there is nothing poisonous in the wheat husks.

ten years ago Wm. H. Seward gave utterance to this prediction:—"Slavery must disappear from this continent and you and I may live to see it." For uttering it he was denounced as a fanatic. He was wrong.

Went down into an old mine, about 20 years, last fall, to the depth of 50 feet, on Friday last, to the depth of 50 feet, when the rocks and rubbish at the top suddenly came in, burying him beneath the debris. The saving mass arched over him, and after six hours he was rescued alive, but not without serious though not fatal injuries.

☞ We understand the Mechanics and Workmen of the city are taking steps to have a newspaper specially devoted to their interests. Such a paper, if placed in proper hands and conducted with ability, may do much good, and we should welcome as a worthy co-worker in the common cause of humanity and true political economy. In unwise or indiscreet hands it might greatly injure the cause it was designed to build
